Question: 1

How does real-time production orchestration in SAP Digital Manufacturing improve resource utilization within global manufacturing networks?

- A. Improves logistics
- B. Manages production with AI automation in real-time
- C. Automates procurement
- D. Aligns financial optimization

Answer: B

Explanation:

The correct answer is:

Solution:

B . Manages production with AI automation in real-time

SAP Digital Manufacturing's real-time Production Orchestration (Resource Orchestration) empowers supervisors

to dispatch, schedule, monitor, and automatically balance production on a live basis—responding instantly to

events on the shop floor and optimizing resources like labor, equipment, and materials us.io

group.com+6learning.sap.com+6help.sap.com+6sap.com+8sap.com+8learning.sap.com+8.

Here's how the other options stack up:

A. Improves logistics – While orchestration connects operations with logistics, its primary purpose is on-floor execution and resource balancing—not optimizing logistics functions directly.

C. Automates procurement – This relates to supply chain/procurement modules in SAP, not manufacturing execution orchestration.

D. Aligns financial optimization – Financial alignment comes primarily from ERP integration, not from real-time production orchestration.

So the best fit is option B.

Question: 2

Which features in SAP IBP assist manufacturers in mitigating the impact of sudden demand spikes and maintaining supply chain stability? Note: There are 2 correct answers to this question.

- A. Risk assessment
- B. Automated supplier contracts
- C. Trend monitoring
- D. Optimized delivery schedules

Answer: A C

Explanation:

Solution:

Based on content from learning.sap.com, the two correct features in SAP IBP that help manufacturers mitigate

sudden demand spikes and maintain supply chain stability are:

☒ A. Risk assessment

SAP IBP (especially through the Supply Chain Control Tower) enables systematic risk assessment, real-time

alerting, and scenario simulation to identify and mitigate supply chain disruptions.

☒ C. Trend monitoring

Within IBP's demand planning capabilities, tools like time-series analysis and demand sensing help detect trends

and anomalies, allowing manufacturers to proactively adjust forecasts and supply plans learning.sap.com.

The other options are not supported by learning.sap.com:

B. Automated supplier contracts – relates to procurement (e.g., SAP Ariba). not core IBP capabilities.

<https://www.examsnest.com>

D. Optimized delivery schedules – this is part of execution/logistics, not directly a core IBP feature for handling demand spikes.

Therefore, the correct answers are A and C

Question: 3

What are the benefits of SAP Visual Inspection powered by AI? Note: There are 3 correct answers to this question.

- A. Increase production lead time
- B. Extended inspection duration
- C. Increase sustainability
- D. Mitigate production risks
- E. Improve quality

Answer: B

Explanation:

Solution:

The correct benefits of SAP Visual Inspection powered by AI—as listed on learning.sap.com—are:

Increase sustainability (C): It helps reduce waste and scrap through optimized detection and corrective actions.

Mitigate production risks (D): By catching defects early, it prevents production issues and downtime

Improve quality (E): Automating defect detection ensures higher product quality and consistency.

The other options—A (Increase production lead time) and B (Extended inspection duration)—are incorrect,

as AI-based inspection aims to shorten lead times and streamline inspections, not prolong them.

Question: 4

Which key points should be discussed when presenting SAP Business Suite to the COO? Note: There are 3 correct answers to this question.

<https://www.examsnest.com>

- A. Real-time visibility
- B. Integrated processes
- C. Expense savings through local suppliers
- D. Automated financial processes
- E. Competitive AI capabilities

Answer: A B D

Explanation:

Solution:

The three key points to highlight when presenting SAP Business Suite to the COO, based on the official narrative

on learning.sap.com, are:

Real-time visibility (A): COOs need agility and resilience, which come from having real-time operational insights to make better decisions.

Integrated processes (B): SAP Business Suite eliminates silos and connects functions such as procurement, finance, manufacturing, and logistics, enabling seamless cross-functional collaboration .

Automated financial processes (D): Higher levels of automation, including in finance, boost productivity and speed—reducing waste in time and resources.

Options C and E are not emphasized in the COO narrative on learning.sap.com.

Question: 5

How does carrier selection functionality in SAP TM optimize freight management in the global logistics network?Note: There are 2 correct answers to this question.

- A. Focuses on the lowest cost option available
- B. Automates international procurement processes
- C. Ensures transparency in transportation processes
- D. Improves production planning for transported materials

Answer: A C

Explanation:

Solution:

The two correct benefits of the carrier selection functionality in SAP TM are:

1. Ensures transparency in transportation processes – The system provides a ranked list of eligible carriers, displaying real carrier rates, availability, and constraints, which promotes clarity in decision making.
2. Focuses on the lowest cost option available – During carrier selection, SAP TM uses optimization algorithms to find the most cost-effective carrier, taking into account constraints such as cost, priority, and equipment capacity .

Therefore, the correct answers are:

- A. Focuses on the lowest cost option available
- C. Ensures transparency in transportation processes
