Version: 4.1

Question: 1

Which of the following API types does SAP recommend to use to achieve clean core Integrations?

Note: There are 2 correct answers to this question.

- A. SOAP
- B. RFC
- C. IDoc
- D. OData

Answer: A, D

Explanation:

SAP S/4HANA Cloud Private Edition encourages clean core integrations using modern API frameworks such as SOAP and OData. These APIs provide robust and standardized connectivity options that support extensibility and integration, without modifying the core SAP codebase. OData, in particular, aligns with SAP Fiori for easier integration across platforms, while SOAP offers strong support for more complex integrations and high-volume transactions.

Question: 2

Which of the following objects can be selected in templates for activity-based costing?

Note: There are 2 correct answers to this question.

- A. Business process
- B. WBS element
- C. Cost center/activity type
- D. Internal order

Answer: A, C

Explanation:

In SAP S/4HANA, activity-based costing templates allow organizations to assign costs more accurately based on real activities and processes. Both business processes and cost center/activity type combinations are integral to this approach, ensuring precise allocation of overhead costs to activities directly involved in production or service processes.

Question: 3

What are some SAP recommended guiding principles to achieve clean core operations?

Note: There are 3 correct answers to this question.

- A. Establish regular housekeeping tasks and procedures
- B. Establish release management
- C. Integrate clean core practices in the end-to-end value process chain
- D. Establish an organizational structure, technical foundation, and transformation methodology for clean core
- E. Define roles and responsibilities as part of a process transformation office

Answer: B, C, E

Explanation:

SAP's clean core guiding principles involve reducing custom code modifications and using release management to maintain a manageable and upgradeable SAP environment. Integrating clean core practices throughout the process chain and defining roles for transformation are key to sustaining streamlined operations within SAP S/4HANA.

Question: 4

What values flow from Sales and Distribution billing to costing-based Profitability Analysis?

Note: There are 2 correct answers to this question.

- A. Value of conditions of the pricing procedure
- B. Value of "Gross Margin 2"

<https://www.examsnest.com>

- C. Cost of goods sold split by cost components
- D. Production variances split by variance categories

Answer: A, C

Explanation:

In SAP S/4HANA, values such as condition pricing and cost of goods sold (COGS) are transferred to costing-based Profitability Analysis. This enables profitability reports with detailed insights on revenue and costs at granular levels, helping businesses analyze performance more effectively.

Question: 5

How does SAP S/4HANA capture costs?

Note: There are 2 correct answers to this question.

- A. Only primary costs are captured in general ledger accounts.
- B. Secondary costs are captured in extension ledger CO that references the leading ledger.
- C. Primary and secondary costs are captured on cost elements.
- D. Primary and secondary costs are captured in general ledger accounts.

Answer: C, D

Explanation:

SAP S/4HANA consolidates both primary and secondary costs within the universal journal in the general ledger, ensuring a streamlined and comprehensive approach to financial reporting. This unified approach enables transparent cost tracking and efficient integration between Financial Accounting (FI) and Management Accounting (CO).
