Question: 1

What option on the breakdown source record helps provide views into whether you need to create additional breakdowns or adjust data values?

- A. Security type
- B. Related List Conditions
- C. Label for unmatched
- D. Run Diagnostics

Answer: C

Explanation/Reference:

Explanation: When you select an indicator as the data source, you can filter the results by breakdown and breakdown element. If you have the 'Label for unmatched' field defined on the breakdown source for a selected breakdown, this label appears in your choice of Elements. Select the label to display scores that do not match any of the elements. This option helps provide views into whether you need to create additional breakdowns or adjust data values.

Question: 2

What data update settings can you enable for a single score visualisation to update the score in real-time?

- A. Background refresh interval (minutes)
- B. Show score update time

<https://www.examsnest.com>

- C. Real time update
- D. Live refresh date (seconds)

Answer: C

Explanation/Reference:

Explanation: Enabling 'Real time update' from the data update settings updates a single score visualisation in real-time. 'Show score update time' shows the timestamp of when the score was last updated. 'Background refresh interval (minutes)' shows how often, in minutes, the landing page refreshes the visualisation if you have navigated away from it. With 'Live refresh rate (seconds)', you can choose the frequency in non-decimal seconds to have a single score reporting widget refresh. If set at the score does not refresh.
