Question: 1

- A. At indication time, the Strict Selector has the following functionalities available:
- B. Open in UiExplorer, Copy to clipboard, Show all matches.
- C. Refresh, Open in UiExplorer, Copy to clipboard.
- D. Accuracy, Open in UiExplorer, Copy to clipboard, Show all matches.
- E. Ignore text, Copy to clipboard, Show all matches.

Answer: C

Explanation:

The Strict Selector option allows you to fine-tune the selector by adjusting the accuracy level and showing all the matches in the UI Explorer. The other options are not available at indication time.

Question: 2

A developer has created a string array variable as shown below:

UserNames = {"Jane", "Jack", "Jill", "John"}

Which expression should the developer use in a Log Message activity to print the elements of the array separated by the string ", "?

- A. String.Join(UserNames, ",")
- B. String.Join(", ", UserNames)
- C. String.Concat(UserNames, ",")
- D. String.Concat(", ", UserNames)

Answer: B

Explanation:

The String.Join method takes two parameters: a separator and an array of strings. It returns a new string that concatenates the elements of the array using the separator. The correct syntax is String.Join(separator, array). Therefore, option B is the correct answer.

Question: 3

What is the default URL of the OCR server that runs the Computer Vision service?

- A. <https://server.uipath.com/>
- B. <https://cvserver.uipath.com/>
- C. <https://cv.uipath.com/>
- D. <https://computervision.uipath.com/>

Answer: C

Explanation:

The default URL of the OCR server that runs the Computer Vision service is <https://cv.uipath.com/>. [This is the endpoint of the UiPath Computer Vision Cloud service, which provides OCR capabilities for document understanding and UI automation1](#). The other options are not valid URLs for the OCR server.

Question: 4

What advantages do pre-built connectors in UiPath Integration Service offer?

- A. Reducing the need for UI and API automation, allowing developers to work exclusively B. with connectors.
- B. Simplified integration with popular applications, faster deployment, and integration across all UiPath Platform product solutions.
- C. Providing a fully customizable catalog of connectors for developing proprietary applications.
- D. Replacing all types of authorization and authentication protocols with a single, standardized method.

Answer: B

Explanation:

[Pre-built connectors in UiPath Integration Service offer the advantage of simplifying the integration process for any automation that uses common applications such as Salesforce, Slack, Microsoft Office 365, SAP®, ServiceNow, and Google G Suite1. They also enable faster deployment and integration across all product solutions within the UiPath Platform2.](#)

Question: 5

Which LINQ method is used to filter data in a List or Data Table based on a condition?

- A. OrderBy

- B. Where
- C. GroupBy
- D. Select

Answer: B

Explanation:

The Where method is used to filter data in a List or Data Table based on a condition. [It returns a new collection that contains only the elements that satisfy the condition¹²](#). The other methods are used for different purposes: [OrderBy for sorting](#), [GroupBy for grouping](#), and [Select for projecting³](#).
