Question: 1

An administrator is configuring and managing multisite deployments.
Which Association Member Status is an invalid status?

- A. Inactive
- B. Asymmetric
- C. Active
- D. Unreachable

Answer: A

Question: 2

The VMware Cloud Director administrator wants to make sure that the system is able to collect log bundles from all cells at once.
How should the administrator accomplish this goal?

- A. Install vRealize Log Insight agent on each cell to redirect logs to a centralized location.
- B. Configure a syslog server on each of the cells, and request the logs from the syslog server.
- C. Map the log location on the primary cell to a shared folder on each of the other cells in the server group, ensuring they all have read/write rights on the primary.
- D. Make sure the NFS server allows read-write access to the shared location by the root system account on each cell.

Answer: D

Question: 3

Which three steps are required to enable east/west firewall in VMware Cloud Director Tenant Portal?
